create your very own
WOODBURN CIRCLE

what you need:

tape + glue + xacto knife or scissors + printable paper =

1 After printing out each sheet*, cut along the solid lines and fold along the dotted lines.
CUT ——————
FOLD - - - - - -

**2** Construct the base by pulling the two tabs towards one another until they interlock.

3 Place a piece of tape over the interlocking tabs to hold them together. Then tape the corner edges together to provide more support for your base.
**4** Once your base is finished, glue the square cutout onto the top of it in order to hide the tabs.
5 Now that your base structure is finished, you can finish by gluing the buildings and trees onto it.**

* Thicker paper, or cardstock, works best.
** Each cut-out is coded to help with placement.
